Contents

NUMBER 1

001 *Norman D. Smith, Timothy A. Cross, Joseph P. Dufficy and Stephen R. Clough.* Anatomy of an avulsion

025 *Kick Kleverlaan.* Three distinctive feeder-lobe systems within one time-slice of the Tortanian Tabernas fan, SE Spain

047 *Chris Paola, Stephen M. Wiele and Mary A. Reinhart.* Upper-regime parallel lamination as the result of turbulent sediment transport and low-amplitude bed forms

061 *Peter D. Thorne, Jon J. Williams and Anthony D. Heathershaw. In situ* acoustic measurements of marine gravel threshold and transport

075 *Keene Swett and Andrew H. Knoll.* Marine pisolites from Upper Proterozoic carbonates of East Greenland and Spitsbergen

095 *Ariel Heimann and Eytan Sass.* Travertines in the northern Hula Valley, Israel

109 *William M. Last.* Sedimentology of a saline playa in the northern Great Plains, Canada

125 *Ron Goldbery and David Richardson.* The influence of bulk shape factors on settling velocities of natural sand-sized sedimentary suites

DISCUSSIONS AND REPLIES

137 *H. W. Van de Poll and I. M. Patel.* Slump blocks, intraformational conglomerates and associated erosional structures in Pennsylvanian fluvial strata of eastern Canada

145 *A. G. Plint.* (Reply)

151 *G. J. De Lange, J. J. Middelburg and P. A. Pruysers.* Middle and Late Quaternary depositional sequences and cycles in the eastern Mediterranean

156 *A Murat and H. Got.* (Reply)

159 *Brian R. Rust and Brian G. Jones.* Channel formation and migration by mass-flow processes in the Lower Carboniferous fluviatile Fell Sandstone Group, NE England

160 *Brian R. Turner and Mary Monro.* (Reply)

163 Book reviews

177 Forthcoming papers

NUMBER 2

179 *Elana L. Leithold.* Depositional processes on an ancient and modern muddy shelf, northern California

203 *Jürgen Schieber.* Facies and origin of shales from the mid-Proterozoic Newland Formation, Belt Basin, Montana, USA

221 *T. J. Barrett and P. W. Fralick.* Turbidites and iron formations, Beardmore–Geraldton, Ontario: application of a combined ramp/fan model to Archaean clastic and chemical sedimentation

235 *Marjorie A. Chan.* Erg margin of the Permian White Rim Sandstone, SE Utah

253 *Fikry Khalaf.* Textural characteristics and genesis of the aeolian sediments in the Kuwaiti desert

273 *N. Lancaster.* The dynamics of star dunes: an example from the Gran Desierto, Mexico

291 *Brian R. Rust and Gerald C. Nanson.* Bedload transport of mud as pedogenic aggregates in modern and ancient rivers

307 *Dale Leckie, Catherine Fox and Charles Tarnocai.* Multiple paleosols of the late Albian Boulder Creek Formation, British Columbia, Canada

323 *Peter N. Southgate.* Relationships between cyclicity and stromatolite form in the Late Proterozoic Bitter Springs Formation, Australia

341 *Margaret N. Rees, Brian R. Pratt and A. J. Rowell.* Early Cambrian reefs, reef complexes, and associated lithofacies of the Shackleton Limestone, Transantarctic Mountains

363 *Jean-Pierre André.* Snowball structures and their slide origin in the Jebel Tekzim Limestone (Palaeozoic of the Jebilet Range, Morocco)

371 *John F. Salvino and Michael Anthony Velbel.* Faceted garnets from sandstones of the Munising Formation (Cambrian), northern Michigan: petrographic evidence for their origin by intrastratal dissolution

381 Forthcoming papers

NUMBER 3

383 *Nicolas J. Beukes and Donald R. Lowe.* Environmental control on diverse stromatolite morphologies in the 3000 Myr Pongola Supergroup, South Africa

399 *Stephen T. Solomon.* The early diagenetic origin of Lower Carboniferous mottled limestones (pseudobreccias)

419 *Julia M. G. Miller.* Glacial advance and retreat sequences in a Permo-Carboniferous section, central Transantarctic Mountains

431 *N. Eyles and A. M. McCabe.* Glaciomarine facies within subglacial tunnel valleys: the sedimentary record of glacio-isostatic downwarping in the Irish Sea Basin

449 *Lars B. Clemmensen and Ronald C. Blakey.* Erg deposits in the Lower Jurassic Wingate Sandstone, northeastern Arizona: oblique dune sedimentation

471 *K. R. Aalto.* Franciscan Complex olistostrome at Crescent City, northern California

DISCUSSIONS

497 *H. M. Pantin.* Evidence for surface reaction—controlled growth of carbonate concretions in shales

499 Book reviews

511 Forthcoming papers

NUMBER 4

513 *S. P. Todd.* Stream-driven, high-density gravelly traction carpets: possible deposits in the Trabeg Conglomerate Formation, SW Ireland and some theoretical considerations of their origin

531 *M. Deynoux, G. Kocurek and J. N. Proust.* Late Proterozoic periglacial aeolian deposits on the West African Platform, Taoudeni Basin, western Mali

551 *B. S. Hart and A. G. Plint.* Gravelly shoreface deposits: a comparison of modern and ancient facies sequences

559 *B. D. Ricketts, P. F. Ballance, B. W. Hayward and W. Meyer.* Basal Waitemata Group lithofacies: rapid subsidence in an early Miocene interarc basin, New Zealand

581 *R. Donnelly and C. Harris.* Sedimentology and origin of deposits from a small ice-dammed lake, Leirbreen, Norway

601 *N. Eyles and C. Eyles.* Glacially-influenced deep-marine sedimentation of the Late Precambrian Gaskiers Formation, Newfoundland, Canada

621 *E. L. Boardman.* Coal measures (Namurian and Westphalian) Blackband Iron Formations: fossil bog iron ores

635 *S. Morad, R. Marfil and J. A. de la Peña.* Diagenetic K-feldspar pseudomorphs in the Triassic Buntsandstein sandstones of the Iberian Range, Spain

651 *C. M. Bell.* Saline lake carbonates within an Upper Jurassic–Lower Cretaceous continental red bed sequence in the Atacama region of northern Chile

665 *N. H. Platt.* Lacustrine carbonates and pedogenesis: sedimentology and origin of palustrine deposits from the Early Cretaceous Rupelo Formation, W Cameros Basin, N Spain

685 *S. Frisia-Bruni, F. Jadoul and H. Weissert.* Evinosponges in the Triassic Esino Limestone (Southern Alps): documentation of early lithification and late diagenetic overprint

701 *A. Gunatilaka.* Spheroidal dolomites – origin by hydrocarbon seepage?

711 *J. Forrest and N. R. Clark.* Characterizing grain size distributions: evaluation of a new approach using a multivariate extension of entropy analysis

723 Editors note

725 Book reviews

735 Forthcoming papers

NUMBER 5

737 *C. D. Woodroffe, J. Chappell, B. G. Thom and E. Wallensky.* Depositional model of a macrotidal estuary and floodplain, South Alligator River, Northern Australia

757 *B. Willis.* Palaeochannel reconstructions from point bar deposits: a three-dimensional perspective

767 *B. Tessier and P. Gigot.* A vertical record of different tidal cyclicities: an example from the Miocene Marine Molasse of Digne (Haute Provence, France)

777 *C. C. von der Borch, A. E. Grady, K. H. Eickhoff, P. Dibona and N. Christie-Blick.* Late Proterozoic Patsy Springs Canyon, Adelaide Geosyncline: submarine origin?

793 *J. R. Ineson.* Coarse-grained submarine fan and slope apron deposits in a Cretaceous back-arc basin, Antarctica

821 *M. J. DiMarco and D. R. Lowe.* Petrography and provenance of silicified early Archean volcaniclastic sandstones, eastern Pilbara Block, Western Australia

837 *Young Kwan Sohn and Sung Kwun Chough.* Depositional processes of the Suwolbong tuff ring, Cheju Island (Korea)

857 *C. C. Birney De Wet and J. F. Hubert.* The Scots Bay formation, Nova Scotia, Canada, a Jurassic carbonate lake with Silica-rich hydrothermal springs

875 *O. Gall and R. Hyde.* Analcime in lake and lake-margin sediments of the Carboniferous Rocky Brook Formation, Western Newfoundland, Canada

889 *P. H. Walker, G. Taylor and R. A. Eggleton.* Properties and origin of a very fine-grained kaolinitic lacustrine deposit

907 *R. G. Maliva and R. Siever.* Chertification histories of some Late Mesozoic and Middle Palaeozoic platform carbonates

927 *A. C. Morton, G. Borg, P. L. Hansley, P. D. W. Haughton, D. H. Krinsley and P. Trusty.* The origin of faceted garnets in sandstones: dissolution or overgrowth?

DISCUSSIONS AND REPLY

943 *J. G. McPherson, J. R. Flannery and S. Self.* Soft-sediment deformation (fluid escape) features in a coarse-grained pyroclastic-surge deposit, north-central New Mexico

947 *B. W. Nocita.* (Reply)

951 *M. Wilkinson.* Evidence for surface reaction-controlled growth of carbonate concretions in shales

955 Forthcoming papers

NUMBER 6

959 *Jon J. Williams, Peter D. Thorne and Anthony D. Heathershaw.* Measurements of turbulence in the benthic boundary layer over a gravel bed

973 *Jon J. Williams, Peter D. Thorne and Anthony D. Heathershaw.* Comparisons between acoustic measurements and predictions of the bedload transport of marine gravels

981 *Douglas J. Sherman and Brian Greenwood.* Hummocky cross-stratification and post-vortex ripples: length scales and hydraulic analysis

987 *R. J. Gibbs, D. M. Tshudy, L. Konwar and Jean Marie Martin.* Coagulation and transport of sediments in the Gironde Estuary

1001 *Koji Yagashita and Asahiko Taira.* Grain fabric of a laboratory antidune

1007 *Cheryl McKenna Neuman.* Kinetic energy transfer through impact and its role in entrainment by wind of particles from frozen surfaces

1017 *Ian Livingstone.* Temporal trends in grain-size measures on a linear sand dune

1023 *R. P. Langford.* Fluvial-aeolian interactions: Part I, modern systems

1037 *R. P. Langford and M. A. Chan.* Fluvial-aeolian interactions: Part II, ancient systems

1053 *David B. Prior and Brian D. Bornhold.* Submarine sedimentation on a developing Holocene fan delta

1077 *William Cavazza.* Detrital modes and provenance of the Stilo-Capo d'Orlando Formation (Miocene), southern Italy

1091 *P. N. Southgate, I. B. Lambert, T. H. Donnelly, R. Henry, H. Etminan and G. Weste.* Depositional environments and diagenesis in Lake Parakeelya: a Cambrian alkaline playa from the Officer Basin, South Australia

1113 *S. K. Tandon and Peter F. Friend.* Near-surface shrinkage and carbonate replacement processes, Arran Cornstone Formation, Scotland

1127 *David M. Martill and John D. Hudson.* Injection clastic dykes in the Lower Oxford Clay (Jurassic) of central England: relationship to compaction and concretion formation

DISCUSSIONS/REPLY

1135 *Stephen J. Burns and Victor Rossinsky Jr.* Late Pleistocene mixing zone dolomitization, southeastern Barbados, West Indies. Discussion.

1138 *John D. Humphrey.* Reply

1143 Forthcoming papers
